THE SAGE DAD

SMALL ADVENTURES. TIME TOGETHER.

How long is a giant step?

SD-B017 / DISCOVERERS · AGES 7–9

Discover how step size changes a count.

YOU NEED: Clear floor; pencil; adult helper

DISCOVER	Choose a safe straight path across a room.
PREDICT	Guess how many of your steps it takes.
SOLVE	Count your steps, then your grown-up's steps.
EXPLAIN	Why might two people get different counts?

MY GUESS AND ACTUAL COUNT

	My GUESS	ACTUAL count
MY steps		
GROWN-UP steps		

Why the counts differ

The counts are different because…

_____

_____

Who took more steps?

- ☐ **Me** _____
- ☐ **My grown-up** _____
- ☐ **Same** _____

GROWN-UP GUIDE: Walk rather than leap. Use the same start and end points for both people.
