THE SAGE DAD

SMALL ADVENTURES. TIME TOGETHER.

Sky Notebook: Cloud Types

SD-B097 / DISCOVERERS · AGES 7–9

Match real clouds to three simple types and sketch each.

YOU NEED: Pencil; a view of the sky

DISCOVER	Clouds come in types: puffy cumulus, flat layers called stratus and wispy cirrus.
PREDICT	Look up. Which type do you see most? Guess before you look closely.
SOLVE	Sketch what you see in the boxes and match each to a type.
EXPLAIN	What might each cloud type tell us about the weather?

MY SKY NOTEBOOK

PUFFY (CUMULUS)

FLAT (STRATUS)

WISPY (CIRRUS)

The sky right now

What I think it means

I think the weather will...

GROWN-UP GUIDE: Go outside on a day with some clouds and never look at the sun. Cumulus are puffy, stratus are flat gray layers, cirrus are thin and wispy. Weather can change, so check again later and compare.
